

SAVE THE DATE

2nd Molten Salt Reactor Workshop

Moving MSRs Forward – The Next Steps

Oak Ridge National Laboratory ■ Oak Ridge, TN ■ USA

October 4-5

Save the dates of October 4-5, 2016, for the next workshop on molten salt reactors. The 2016 workshop will build upon the highly successful “50th Anniversary of the Startup of the MSRE” held last year at the Oak Ridge National Laboratory. ORNL will again host this second MSR workshop with the theme of “Moving MSRs Forward -The Next Steps.” We plan to have sessions on MSR-related progress made in the areas of R&D, technology enhancements, and commercial developments since the 2015 workshop as well as the status of licensing related initiatives that are being undertaken via the DOE-NRC collaborations on advanced reactors.
