

Creating a Self-Sustaining Environment for MSR Success

Join us for the 2018 Molten Salt Reactor (MSR) Workshop at Oak Ridge National Laboratory in Oak Ridge, TN, October 3-4.

Sessions will include

- ◆ progress of the inaugural MSR Campaign within the Department of Energy's Advanced Reactor Technologies Program,
- ◆ updates from MSR developers,
- ◆ discussions on enabling and enhancing MSR technologies, and
- ◆ connections to industry partners.

This year's workshop coincides with ORNL's 75th Anniversary "Nuclear Week" celebration, which will include networking opportunities for all.

More information will be provided in the coming weeks when the registration site becomes available.

Contact: Anita Benn, bennas@ornl.gov, 865-574-0377.
